Are You Smarter Than a 5th Grader PowerPoint Game!

Today I am sharing with you a very popular PowerPoint game "Are You Smarter Than a 5th Grader Game Template." With this game you will also get the catchy song "Are You Smarter Than a 5th Grader." So, make sure you turn-on your speakers!

There are three versions of the game. The first in the file is an empty template; the second is to acquaint students with what Math tools are available in SuccessMaker. The questions help the student find and navigate the tools menu. The third, Math_2, requires the students to actually use and manipulate the tools to answer questions.

**Students’ use of the embedded tools within SuccessMaker is crucial for providing the richest learning experience possible while ensuring time in SM matches their IEPs and Modifications!**

To play this game, randomly pick students to play the game. The students can collect the money amounts as a team. The rest of the class will be in the audience. **When you play this game, make sure to click on the left hand side of the screen so the dollar amount shows each time the student gets an answer correct.**

**Extension and Enrichment Opportunity**

As a reward for reaching a certain milestone in SuccessMaker (teacher choice), provide the blank template to student(s) and have then create their own version. There are countless opportunities for original math questions. Then at the appropriate time, the teacher can announce today we are playing "Javier’s Are You Smarter Than a 5th Grader."
Congratulations! As a Master User of SuccessMaker Math, you can now create your very own version of "Are You Smarter Than a 5th Grader."

The tool bar in SuccessMaker offers all kinds of possible questions for your classmates to try and solve. **Think of great questions and create your own game. The class will play it and you will act as the host!**

You will need to type the topic questions and the answers on the appropriate slides in the PowerPoint. Take a look at the picture below and you will see the available categories. Be sure to change the version name to your own and go to the Question and Answer slides to create your own challenging moments – good luck!
