Clarifying "Consultants" Object 6291 versus 6299

6291—Campuses as well as most departments RARELY use a consultant as defined by TEA. A true consultant (object 6291) performs research and analysis on a specific issue or problem found within KISD—the district as a whole, a specific department, or a campus—on his/her own or with a team. The consultant will present the results of the research and analysis as well as any suggestions for improvement to administration, but not to the district, campus, grade, department as a whole.

6299—If you are paying someone to present information during an organized activity (*professional development training, instructional presentation for the students, grade-level meetings, etc.*) you are paying for a Miscellaneous Service and that should be charged to object 6299.
