

Medical Procedures- Physician's Order Form

Certain medical procedures can be performed at school with the proper documentation. Written permission from the physician and parent/guardian must be presented to the campus nurse before the procedure can be performed at school by school personnel. The parent/guardian will be required to perform the procedure until the proper documentation can be obtained and presented to the nurse. In some instances the campus nurse will train unlicensed personnel to perform the task.

In order to access Physician's orders for a specific procedure, you will need to return to the Health Services web page and click on the physician order you need.
