<p><i>Communication</i></p>	<p>Getting to Got it Betty Garner 9781416606086</p> <p>In this book, Betty K. Garner focuses on why students struggle and what teachers can do to help them become self-directed learners. Difficulty reading, remembering, paying attention, or following directions are not the reasons students fail but symptoms of the true problem: underdeveloped cognitive structures the mental processes necessary to connect new information with prior knowledge; organize information into patterns and relationships; formulate rules that make information processing automatic, fast, and predictable; and abstract generalizable principles that allow them to transfer and apply learning.</p>
<p><i>Communication</i></p>	<p>Leading Change John Kotter 9780875847474</p> <p>John Kotter’s now-legendary eight-step process for managing change with positive results has become the foundation for leaders and organizations across the globe. By outlining the process every organization must go through to achieve its goals, and by identifying where and how even top performers derail during the change process, Kotter provides a practical resource for leaders and managers charged with making change initiatives work.</p>

<p><i>Communication</i></p>	<p style="text-align: center;">Our Iceberg is Melting</p> <p style="text-align: center;">John Kotter</p> <p style="text-align: center;">31236198</p> <p>Most of the denizens of the Antarctic penguin colony sneer at Fred, the quiet but observant scout who detects worrying signs that their home, an iceberg, is melting. Fred must cleverly convince and enlist key players, such as Louis, the head penguin; Alice, the number two bird; the intractable No No the weather expert; and a group of school-age penguins if he is to save the colony. Their delightfully told journey illuminates in an unforgettable way how to manage the necessary change that surrounds us all. Simple explanatory material following the fable enhances the lasting value of these lessons.</p>

Dr. Kumin draws on her vast experience to show parents how they can support and encourage their child's speech and language development from birth to age 6 (or when a child can form 2- to 3-word sentences). Parents and teachers learn how to work through characteristic challenges, including hearing loss, intelligibility issues, apraxia (difficulty planning oral-motor movements), or a slower pace of development. Families soon see that many children with Down syndrome are natural and willing communicators.</p>

They are books that take a child's point of view, especially if the child suffers from some physical challenge or lack self-confidence in going about everyday activities. These attractively illustrated picture storybooks encourage kids never to be afraid of a challenge. Following each story are four pages of suggested activities that relate to the book's theme. A final two-page section offers advice to parents. The child in this story knows the alphabet, but she sometimes has trouble putting all the letters together to read words. No matter how hard she tries, she often mixes up the letters or writes them backwards. She's unhappy until her teacher explains that she has dyslexia, and that she can be helped to read and write correctly.</p>

Darling</p> <p align="center">9781572304666</p> <p>This comprehensive and clinically useful resource provides a multi-systems perspective on childhood disability and its effects on family life. The volume examines the many variables that shape the ways families respond to childhood disability and the extent to which they can overcome the physical, cultural, and social barriers to a satisfactory lifestyle. Integrating theory and research with evocative first-hand accounts from parents, siblings, and grandparents, the authors demonstrate how to apply a social and family systems-based approach to assessment and intervention with diverse families.</p>

Draper</p> <p align="center">9781416971702</p> <p>"If there is one book teens and parents (and everyone else) should read this year, Out of My Mind" should be it" (Denver Post).Melody is not like most people. She cannot walk or talk, but she has a photographic memory; she can remember every detail of everything she has ever experienced. She is smarter than most of the adults who try to diagnose her and smarter than her classmates in her integrated classroom--the very same classmates who dismiss her as mentally challenged, because she cannot tell them otherwise. But Melody refuses to be defined by cerebral palsy. And she's determined to let everyone know it...somehow. In this breakthrough story--reminiscent of The Diving Bell and the Butterfly"--from multiple Coretta Scott King Award-winner Sharon Draper, readers will come to know a brilliant mind and a brave spirit who will change forever how they look at anyone with a disability.</p>
