## Medications/Doses

Epinephrine (brand and dose): \_

Antihistamine (brand and dose):

Other (e.g., inhaler-bronchodilator if asthmatic):

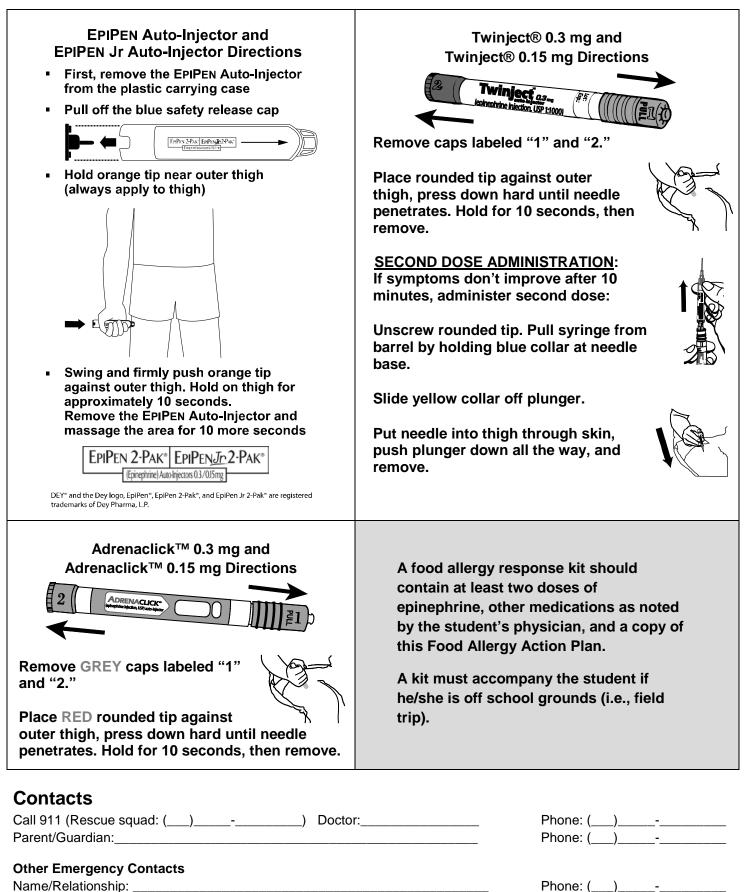

## Monitoring

Stay with student; alert healthcare professionals and parent. Tell rescue squad epinephrine was given; request an ambulance with epinephrine. Note time when epinephrine was administered. A second dose of epinephrine can be given 5 minutes or more after the first if symptoms persist or recur. For a severe reaction, consider keeping student lying on back with legs raised. Treat student even if parents cannot be reached. See back/attached for auto-injection technique.
