Hi, my name is Hunter King and I work for the Killeen Daily Herald. We are looking for an update to the Nolan Middle School construction that has been going on.

How is it going?
City of Killeen plan review for the Clifton Park / Bellaire Elementary School Consolidation project is nearly complete, and we are awaiting receipt of a building permit to begin earthwork and utility installation.

A demolition permit has been received and demolition of the existing Nolan Middle School tennis courts is underway. Demolition of the Nolan Middle School football fieldhouse and concessions building will be underway in the next couple weeks.

Minor parking lot work at Nolan has begun to allow for a reconfigured traffic flow for the 2019-2020 school year, and new directional signage has been installed at the entries.

What is the timeline?
We anticipate major construction activities to begin in September, pending receipt of building permits. Earthwork and utility installation will be the first activities to occur. Concrete piers and the building foundation are scheduled be installed between December 2019 and March 2020, and the building should begin to go vertical around February 2020. The project is scheduled for substantial completion in February of 2021 and the new facility will open in Fall of 2021.

Also, I have attached a picture to the email. Is the construction pictured related to the cell tower construction or the new school construction?
The photo below is of an electric panel rack that has been installed by KISD electricians to support the 4 double portable buildings that have been placed on the property. Three of the double portables will be used for Athletics functions and one of the double portables will be used as classrooms.

Thank you.
